

TN FAASTeam presents:

Mountain Flying

Mountain flying is both challenging and rewarding. There are many valid reasons for mountain flying, such as personal enjoyment, aerial photography, training, fire patrol, law enforcement, business travel, search and rescue, game and fish surveys, and the like. Regardless of your motivation for flying the mountains, it is necessary to develop good judgement and proper techniques.

We will cover many facets of mountain flying including limitations, restrictions, must know information, your experience level, mountain flying rules, and last but not least, mountology.

Our speakers have years of combined experience flying in Alaska, Idaho, Montana, Canada and other mountainous areas with experience in DeHavilland Beavers, Cessna 180/185's, Cessna 206/207/208's and Piper Supercubs.

Please come a join us for a great time of fun and comradery between pilots. Lunch will be provided. We will start at 9am and finish around 3pm.

Directions: Take I-75 to exit 27 and turn east on Paul Huff Parkway/Stuart Road NE (approx 3.4 miles). Turn left on Michigan Avenue Road NE/Dry Valley Road NE for 2.1 miles. Terminal will be on your left.
